

Header Status	Description
Open	Designates that one or more RTV lines are open. Appears by default when the RTV is initiated.
Shipped	When the line's shipped quantity equals the returned quantity. Once the header is in "Shipped" status, you can no longer select the RTV for this function.
Closed	All of the RTV lines have been closed by the RTV Reconciliation process
Cancelled	All RTV lines have been cancelled

Line Status	Description
Open	This status appears by default when the vendor return is initiated
Shipped	The line has been shipped. A line is considered shipped when the line's Ship Qty equals the Return Qty
Closed	The line has been closed
Cancelled	The line has been cancelled
